JOB EXPERIENCES

- ▶

BACK-END DEVELOPER

HCL Technologies. | Heredia Costa Rica| 2022– 2024

» Implement additional functionalities within various architectural layers of web applications developed using the .NET framework.

» Debugging and maintenance of web services.

» In recent months, I collaborated with a team on the implementation of a cloud-based identity access management solution known as PingOne, which is designed to provide secure access management capabilities.
- ▶

FRONT-END DEVELOPER

Cargill Corp. | Heredia Costa Rica | 2020– 2021

» Participate in the daily Scrum meetings.

» Engage in the evaluation of the objectives associated with the upcoming sprints.

» Participate in retrospective meetings following the conclusion of each sprint to evaluate performance, identify areas for improvement, and formulate actionable strategies for future enhancements.

» Develop user interface features, including Create, Read, Update, and Delete (CRUD) functionalities; implement carousel components; construct data tables; and integrate other user interface controls.
- ▶

FULL-STACK DEVELOPER

Ex2 Outcoding. | San Jose Costa Rica| 2019– 2020

» Execute the implementation of feature requests and resolve identified bugs.

» Developing algorithms to address data management challenges.

» Executing a debugging process to reproduce an error that has been reported.

» Built new interfaces, including dynamic geolocation maps and calendar modules, to facilitate class scheduling.

» Evaluate the pull request submitted by other team members and communicate the results of the review to the respective contributors.
- ▶

FULL-STACK DEVELOPER

HP| Heredia Costa Rica| 2017– 2019

» Develop C# web applications encompassing the user interface, business logic, and data access layers.

» Ensure continuous development across development, testing, and production environments.

» Administer projects in Team Foundation Server (TFS), encompassing user access control and security protocols.

» Perform operations on SQL Server databases, including creation, modification, and deletion.

» Transfer project data and resources to MSWS servers.

» Develop project plans, analyze requirements, and design the application architecture.

» Automate data ingestion processes from email using bots implemented via Selenium.
- ▶

APP SUPPORT ANALYST

Steward Lender Services| San Jose Costa Rica| 2015– 2016

» Formulate SQL queries for the purposes of updating, modifying, and inserting data across various databases situated on multiple servers.

» Implement automation for monitoring processes.

» Troubleshoot and rectify subscription errors associated with SQL Server Reporting Services (SSRS) reports.

» Generate reports utilizing the ServiceNow (SNOW) ticketing system.

» Conduct analysis of SSRS reports.

MY EDUCATION

- ▶

SYSTEM ENGINEERING

Universidad Fidélitas| Costa Rica| 2010 - 2013
- ▶
